DETAILED ACTION

Response to Arguments

1. With respect to the 102 (b) rejection of claims 1 and 2 under Paltieli (6200279), applicant has not submitted a response to this rejection which was part of the office action mailed on 3/17/09. Applicant should submit an argument under the heading "Remarks" pointing out disagreements with the examiner's contentions, amend or cancel the claims. Applicant must also discuss the reference applied against claims 1 and 2, explaining how the claims avoid the references or distinguish from them. Applicant submitted a terminal disclaimer with respect to the double patenting rejection of claims 1 and 2 but claims 1 and 2 were also rejected by Paltieli (6200279) under 102(b) and cannot be overcome by a declaration or affidavit. Examiner maintains the rejection since the rejection has not been argued and claims have not been amended.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Paltieli (6200279). Paltieli et al. discloses a method for detection of complications during labor to monitor any critical conditions such as the frequency, duration, and strength of uterine contraction and measuring cervical dilation (col. 4 lines 46-64). The steps involve touching a position sensor (PS 1-5, fig. 5) to a point on a fetal presenting

part of a fetus in a mother (col. 4 lines 18-23) and capturing a position of the position sensor and touching the position sensor to a set of points on the mother and capturing the position of the position sensor at each point (col. 4 lines 8-9) and detecting a complication.

Conclusion

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
